

TEERAPHAT LANSANTAD

FULL STACK DEVELOPER, FRONTEND DEVELOPER,
BACKEND DEVELOPER

- 064 547 2739
- tlansantad@gmail.com
- github.com/Teeraphat2104
- Bangkok, Thailand

ABOUT ME

Full Stack Developer with experience building web applications using Laravel, React, and modern web technologies. Skilled in RESTful API development, database design, and responsive user interface implementation. Passionate about delivering scalable and maintainable software solutions.

TECHNICAL SKILLS

Backend

- PHP (Laravel)
- Golang
- Node.js
- RESTful API Development

Frontend

- HTML, CSS, JavaScript
- Blade Template Engine
- React, Next.js
- Tailwind CSS, Bootstrap
- jQuery, AJAX

Database

- MySQL
- MongoDB
- Database Design

Tools & DevOps

- Git, GitHub
- Docker
- Postman
- Fork

Software Engineering

- MVC Architecture
- CRUD Operations
- Authentication & Authorization
- Role-Based Access Control (RBAC)
- JSON Web Token (JWT)
- Version Control

AI & Automation

- Prompt Engineering
- AI-Assisted Development
- LLM Integration
- AI Agent Development

EXPERIENCE

BACKEND / FULL STACK DEVELOPER INTERN Nov 2025 – Mar 2026

AIRPORTELS — Nonthaburi, Thailand

- Developed and maintained RESTful APIs supporting luggage check-in, storage tracking, and retrieval workflows for airport operations.
- Designed and implemented MySQL database schemas, including booking records, storage management, and customer-related data structures.
- Built and enhanced web interfaces using Laravel Blade and React, integrating AJAX and jQuery for dynamic user experiences.
- Implemented request validation, business logic, error handling, and API response management across backend services.
- Collaborated with cross-functional teams using Git and Lark, participating in code reviews, testing, and iterative feature development.
- Contributed to the full software development lifecycle, from database design and API development to frontend integration and deployment support.

Technologies: Laravel, PHP, MySQL, JavaScript, AJAX, Bootstrap, Blade, Git

ACADEMIC PROJECT

GRADUATE REPORTING SYSTEM

(2024)

Chaiyaphum Rajabhat University, Thailand

- Engineered a web-based platform for graduate registration, attendance verification, and information management.
- Developed backend modules and RESTful endpoints using Laravel to handle student submissions and reporting workflows.
- Designed relational database structures and optimized data processing for efficient record management.
- Created responsive and interactive user interfaces using Blade, JavaScript, and AJAX.
- Automated administrative workflows, reducing manual processes and improving operational efficiency.

Technologies: Laravel, PHP, MySQL, JavaScript, AJAX, Bootstrap, Blade, Git

EDUCATION

Bachelor of Science in Computer Science
Chaiyaphum Rajabhat University, Chaiyaphum, Thailand
July 2022 – April 2026
Graduated
GPA : 3.69/4.00
